

Oracle Auditing: fix_sysaux.bash: "Logon using _dba/aleph_dba as sysdba failed"

- **Article Type:** General
 - **Product:** Aleph
 - **Product Version:** 20
-

Description:

In applying the changes per the news item "Oracle Auditing" on the CRM we have encountered an error:

```
...  
root@alapp20 tmp]# bash fix_sysaux.bash aleph_dba  
Logon using _dba/aleph_dba as sysdba failed  
...
```

Resolution:

The attempt to run the script fix_sysaux.bash failed since the user ALEPH_DBA is not granted with the sysdba privilege.

In order to fix this, you should log on as sys and use the command:

```
SQL>grant sysdba to aleph_dba
```
