Description:

Even though the xxx30 doc record contains a CNO-6 field, the "Period" field in the Web Staff Course Reserve Document Full View is blank. Why?

Resolution:

The www_r_doc_view program which produces this display calls edit_doc_002 (the Name Tags view). This view: reads each field in the record, gets the name from column 9 of the ./xxx30/tab/tab01.eng, and then reads the ./xxx30/tab/edit_field.eng to see what subfields should display..

The ./xxx30/tab/edit_field.eng carried over from 14.2 had a "1 # CNO;" entry with subfields a, b, c, d, and n..

Copying the "CNO-6" entry (with "#" for all subfields) from the ./usm30/tab/edit_field.eng corrected the problem.
