Description:

Following the article " [Customization of pc_b_eng and error_eng files in version 17-up **MASTER RECORD**](#) " (KB 8192-824) , I think I got the various files moved around to account for the move of pc_b_eng and error_eng. For the custom stuff I have added to the services, I don't see a parallel for the SQL and procedures that, in R16, went into /exlibris/aleph/a16_1/alephm/sql_stat and /exlibris/aleph/a16_1/aleph/proc. That is, no equivalent proc and stat directories on the u16_1/alephe side, is that correct?

Resolution:

The /exlibris/aleph/a18_1/alephm/sql_stat and /exlibris/aleph/a18_1/aleph/proc directories are not affected by this change (just the pc_b_eng and error_eng).

If you have made local changes to the /exlibris/aleph/a18_1/alephm/sql_stat and /exlibris/aleph/a18_1/aleph/proc, then you will need to maintain those in the same way that you did in v16.
