

Adding fields to Header Configuration?

- **Article Type:** General

Description:

Is it possible to add new Header fields to a GUI screen that do not exist in the Header Configuration?

For example, we would like to add ISSN to the Brief list on the "Show" screen in Acquisitions, but ISSN is not an option in the Header Configuration box.

Resolution:

The columns which are available for inclusion in pc displays are those which you see in pc_tab_col.eng (and in the "Header Configuration").

If a column is set to 00 percent, you can make it display by giving it a non-zero percentage (or by checking it in the GUI "Header Configuration").

But you cannot add columns which are not there at all. That requires a program change.

Additional Information

Header configuration, ISSN
