Description:

The Order Group field on the Multi Order Form does not allow free text to be entered. It only allows a customized list. How can free text be entered in the Order Group field on the Multi Order Form like can be done in the Order Group field on tab2.General?

Resolution:

From Ex Libris: "The problem is already fixed in ver.20.1 (please note that in ver.20.1 the window has been replaced by the new one, Go to 'Order Search' tab -> 'Bulk Ordering' node in the left tree -> 'Order All' button)."
