## util c/8: "Can't delete entry"

- **Article Type:** General
  - **Product:** Aleph
  - **Product Version:** 15.2
- 

### Description:

util c/7 has the same job ("00144") repeated 8 times:

```
p_manage_35 00144 Holding until 20060926 00
p_manage_35 00144 Holding until 20060926 00
p_manage_35 00144 Holding until 20060926 00
p_manage_35 00144 Holding until 20060926 00
p_manage_35 00144 Holding until 20060926 00
p_manage_35 00144 Holding until 20060926 00
p_manage_35 00144 Holding until 20060926 00
p_manage_35 00144 Holding until 20060926 00
```

When I try to delete it with util c/8, I get the following:

Enter entry number to delete,Q = QUIT,S = SHOW:

144

Can't delete entry 144

### Resolution:

The following series of commands corrected this problem:

```
dlib xxx01 [where "xxx01" is the library]
df1
rm que_batch
touch que_batch
```

(The "rm" deletes the existing queue and the "touch" creates a new, empty one.)

---

## Additional Information

util c/8, batch queue
