Description:

We include the USER-REC-VERIFICATION-1 in our PLIF file but it doesn't seem to do anything. Does this actually work?

Resolution:

The use of the USER-REC-VERIFICATION-1 is no longer supported in versions 16 and 17.

It is omitted from the "How To Use the PLIF" document and shows in the v19 p_file_20 Help file as "Deprecated (not in use)".

It is being considered as an enhancement in version 20.
