
Upgrade Express: "ORA-01031: insufficient privileges"

- **Article Type:** General
 - **Product:** Aleph
 - **Product Version:** 20
-

Description:

I am running Upgrade Express 18 to 19.

I am getting Oracle error messages on several steps such as 1001, 1002, and 1005:

```
1001.log:A_ERROR: Couldn't do create table ABC50.z67_new (  
1001.log: TABLESPACE TS1D : ORA-01031: insufficient privileges (DBD ERROR: OCISmtExecute)  
1001.log:A_WARNING: The table z67 cannot be found in STH50. Error from Oracle:  
1001.log:DBD::Oracle::db prepare failed: ORA-00942: table or view does not exist (DBD ERROR: error possibly near <*>  
indicator at char 30 in 'select Z67_REC_KEY from ABC50.<*>Z67 order by Z67_REC_KEY') [for Statement "select  
Z67_REC_KEY from ABC50.Z67 order by Z67_REC_KEY"] at /eexl/aleph/upgrade_express_1801_1901/  
upgrade_express_1801_1901/source/1001/remove_holes.pl line 31.
```

Resolution:

[From site:] "we temporarily granted Aleph_Admin DBA privileges. All of the error messages disappeared, except in two demo libraries: vir01 and ext01." [See KB 16384-38738 for more on those libraries.]
