

Server Restart after util h/2 or util h/3 header update?

- **Article Type:** General
 - **Product:** Aleph
 - **Product Version:** 18.01
-

Description:

After running the Util/H/2 and Util/H/3 for the 1871 service pack, is it necessary to restart any of the servers for the changes to take effect?

Resolution:

The table headers updated by util h/2 and util h/3 are not used by the programs. (They exist only to provide information to the staff member looking at the tables.)

Therefore, nothing needs to be restarted.
