Question

How to include the barcode in the PST field (in addition to the ItemSequence number) when the information is drawn from the Z30 record?

Answer

* The z30_barcode can not be included in the PST field.

* It can, however, as described in KB 4116 ("What is expand_doc_bib_z30?"), be included as a subfield in a "Z30-1" bib record field.
