

OPAC page displayed when library is locked

- **Article Type:** Q&A
 - **Product:** Aleph
 - **Product Version:** 20
-

Question

When the library is locked, in the OPAC you see the page base-list. How can this be changed?

Answer

This is hardcoded and cannot be changed.

What can be changed, is the system message in the status line. It is defined in `$alephe_root/error_lng/www_f_heading`:

0101 L Requested library is unavailable at the moment.
