

## Adding data to existing model?

- **Article Type:** General
  - **Product:** Aleph
  - **Product Version:** 16.02
- 

### Description:

I'm working on a report in Query Studio, based on the existing General Acq report. I'm able to get all the data I want except Item Processing Status. Is there a way to add Process Status to the Acquisitions model?

### Resolution:

The requested feature is not currently supported in ALEPH.
