Question

How can new report formats be added to the drop down list in “Print catalog records – Columnar format” (print-08)?

Answer

- * Add report format and output details to `./xxx01/tab/rep_tab_short.lng`
- * Note that can be defined up to 6 columns for report format
- * Add the report format number (in first column of `rep_tab_short.lng`) along with descriptive text to the report format section (F03) in `./alephe/pc_b_lng/p-print-08.xml`.
- * If `p-print-08.xml` is not present in the directory, copy the `p-print-08.xml` from the `$aleph_root/pc_b_lng` to `$alephe_root/pc_b_lng`
- * re-start PC server
