
Adding fields to print in p-ill-01

- **Article Type:** General
 - **Product:** Aleph
 - **Product Version:** 14.2
-

Description:

The output file of p-ill-01 (New Requests) does not include the fields year, volume, number and page info. Since these fields are necessary for journal requests, how can they be added?

Resolution:

To see this info in printout, the next lines should be added to the next tables, like I added on ram 37 / usm50:

1. USM50 / bib_format:

ill-new-requests 997

(ill-new-requests is the template name, 997 is the format template uses for bib fields display)

2. Usm20 / edit_paragraph.Ing:

997 ISS## D

Template takes the field "ISS" where required bib info is stored in catalog

2. Usm20 / edit_field.Ing

1 L ISS## D

2 y A

3 v ^

4 i ^

5 p ^

This table defines the way required bib info is displayed in template ; y,v,i,p are subfields of ISS field.

Additional Information

p-ill-01, ill-new-requests, new requests
