
p_cir_77: does it consider USER-SHARING?

- **Article Type:** General
 - **Product:** Aleph
 - **Product Version:** 20
-

Description:

Does p_cir_77 check the ADM's tab100 USER-SHARING value in considering whether to perform an update?

Resolution:

p_cir_77 checks the ADM's USER-SHARING value only in the case of an update to the delinquency (b_cir_77_b4). (In that case, if USER-SHARING not = Y, then no update is made.)

For other types of updates/deletions, p_cir_77 does not check USER-SHARING.
