
double entries in e-shelf/double e mails when using FireFox

- **Article Type:** General
 - **Product:** Aleph
 - **Product Version:** 18.01
-

Description:

Problem Description:Variation of problem resolved by rep_change 1261.

Removed <include>include-window from the header section of file booking-page-head but when using Firefox 3.0 (or any earlier version of Firefox) double emails are generated and double entries in my e-shelf are created using the scenarios described below.

Note the problem has not been able to be replicated with IE.

Actual Results:Two emails are sent or entries created in my e-shelf

Expected Results:Only one email would be sent or entry created in my e-shelf

Resolution:
