

Location (PST) not included properly in Word index

- **Article Type:** General

Description:

I'm trying to add the PST \$x to the WCA index in MUS01. This is the line I added to tab11_word:

```
PST x 03 WCA
```

And here is the WORD section of tab_expand:

```
WORD expand_doc_bib_loc_usm
```

```
WORD expand_doc_type tab_type_config.eng
```

```
WORD expand_doc_fix_abbreviation
```

```
WORD expand_doc_deleted
```

I believe that I'm doing something wrong with the expands. Can you point me in the right direction?

Resolution:

The field output by the expand_doc_bib_loc expand is not "PST" but rather "LOC". You would need to specify "LOC##" in tab11_word.

This issue is discussed in detail in KB 4022.
