
SRU - DNB MABXML to Aleph

- **Article Type:** General
 - **Product:** Aleph
 - **Product Version:** 20, 21, 22, 23
-

Desired Outcome Goal:

After switching to GND (special German Authority format) the German National library does not provide the data in MAB format for Z39.50 anymore. SRU interface must be used instead but this provides no format MABXML in the form the German National library delivers the data. Can this be adapted?

Procedure:

Because the German National Library does only deliver the data in MABXML until July 2013 this can not be developed for this short time. The only option is to convert the data from MARC21 to MAB format:

```
$alephe_gate/dnb_sru.conf
```

```
Z58-IN-RECORD-FIX DNB2M
```

```
./ext04/tab/tab_fix
```

```
! 1                2                3
!!!!-!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!>
DNB2M fix_doc_convit                FILE=tab_fix_usm2mab
DNB2M fix_doc_mab                    FUNC=INPUT,FILE=tab_fix_mab_gnd
```

```
./ext04/tab/tab_fix_usm2mab copied from MAB01/tab
```

```
Entry in .\alephcom\tab\searbase.dat
```

```
DNB_SRU                DNB SRU                EXT04                EXT04
```
