
WebVoyage: how to suppress limit on Advanced search tab?

- **Product:** Voyager
-

Question

How to suppress the "Place" or other limit from use on the Advanced search tab?

Answer

1. On the server, navigate to your skin directory.
2. `cd xsl/contentLayout`
3. Open `cl_searchAdvanced.xml` for editing.
4. Find the lines for the limit you wish to suppress & comment them out. For example, to suppress "Place":

```
<!-- place line -->
<!--
<xsl:for-each select="/page:page//page:element[@nameId='place']">
<div class="limitDiv">
<xsl:call-template name="buildLimitSetDropDown">
<xsl:with-param name="limitType" select="'place'"/>
<xsl:with-param name="selectedLimit" select="''"/>
<xsl:with-param name="limitData" select="$Limits"/>
<xsl:with-param name="cssClass" select="'searchAdvancedPlaceMargin'"/>
</xsl:call-template>
</div>
</xsl:for-each>
-->
```

5. Save changes.
