

No access to Collection Tool

- **Article Type:** General
 - **Product:** SFX
 - **Product Version:** 3
-

Description:

Access to Collection Tool in my SFX Admin Center is blocked with a red X instead of a link. How do I restore it?

Resolution:

The permissions set up was changed slightly with the May revision (20060501) so that a new permission needs to be set in order for a user to have access to the Collection Tool. In the user_permissions.config file in your instance's config directory, the following line needs to be added for every profile that should have access to the Collection Tool:

```
COLLECTION.READ "Y"
```

Additional Information

collection,tool,configuration,permission,access
