## cir-30: statistics by sublibrary / Course Reserves

- **Article Type:** Q&A
  - **Product:** Aleph
  - **Product Version:** 21
- 

### Question

Are the transactions which occur when an item is on reserve (sublibrary "XXXUR") counted in a cir-30 ("General Circulation Statistics") report for its regular sublibrary ("XXXUP")?

### Answer

When one asks for statistics for a particular sublibrary , only the transactions which occurred when the item belonged to that sublibrary will be counted: if one asks for XXXUP statistics, the transactions which occurred when the item was part of the XXXUR sublibrary will not be counted.

### Additional Information

The same applies to the custom priv-21 ("Detailed Circ Statistics") Service.
