
Changing date display settings.

- **Article Type:** General
 - **Product:** DigiTool
 - **Product Version:** 3
-

Description:

How do I change the date display settings?

Resolution:

1. For java modules:

```
>>j_conf
```

In repository_configuration.xml change the date parameters to the desired format:

```
<parameter>
```

```
<p_key>system_date_format</p_key>
```

```
<p_val>dd/mm/yyyy</p_val>
```

```
</parameter>
```

2. For the Resource Discovery side:

```
>>cd $dtle_root
```

Within dtl_start:

```
setenv dtl_date_time 2
```

(1 is US - mm/dd/yyyy - 2 is European - dd/mm/yyyy)

3. To commit changes:

a. source dtl_start

b. start_w

c. start_pc

d. re-load repository configuration ("mng" maintenance job)
