## Automatic start/stop of jboss

- **Article Type:** Q&A
  - **Product:** Aleph
  - **Product Version:** 20
- 

### Question

How does one make jboss start automatically, for instance, after a reboot? And how does one make it stop automatically?

---

### Answer

The following lines in \$alephe\_root/aleph\_startup cause jboss to start automatically:

```
cd $aleph_dev/ng/aleph/home/system/bin  
bash jboss_startup.sh
```

And the following in \$alephe\_root/aleph\_shutdown make it stop automatically:

```
echo "Shutting down JBOSS..."  
cd $aleph_dev/ng/aleph/home/system/bin  
grep shutdown.sh jboss_shutdown.sh | bash -s
```

---

### Additional Information

See KB 16384-28513 ("Problems starting JBOSS").
