

How To Delimit Call Numbers In Biaf Label

- **Article Type:** General
 - **Product:** Aleph
 - **Product Version:** 20
-

Desired Outcome Goal:

To Delimit Call Numbers In BIAFLabel

Procedure:

1. In BIAF Label, select the Delimiter tab
 2. Select the desired delimiter type from the Get Field By Delimiter box
 3. To set the number of fields select Number Of Fields under the tab entitled Select Number Of Fields
 4. To print each field as a new line, check the New Line checkbox
 5. To add a delimiter after each new field, check the Add Delimiter checkbox
-

Additional Information

In BIAF Label, call numbers can only be delimited after the first two characters, or when transitioning between alphabetic and numeric characters
