## No job "p\_cir\_83" in v18 Services menu

- **Article Type:** General
  - **Product:** Aleph
  - **Product Version:** 18.01
- 

### Description:

I don't see a service option for p-cir-83 anywhere.

I do see a p\_cir\_83 in /exlibris/aleph/a18\_1/aleph/proc, but not sure how you would run that from the GUI if it isn't listed under the services, and I don't see that job listed in /exlibris/aleph/u18\_1/alephe/pc\_b\_eng.

### Resolution:

As you can see from the following, the p\_cir\_83 is present:

```
>>pcb
>>pwd
/exlibris/aleph/a18_1/aleph/pc_b_eng
>>ls *cir-83*
p-cir-83.xml
```

This is like the article "[Customization of pc\\_b\\_eng and error\\_eng files in version 17-up \\*\\*MASTER RECORD\\*\\*](#)" (KB 8192-824) . Specifically, I see that in this case there is an /exlibris/aleph/u18\_1/alephe/pc\_b\_eng/menu-circ.xml (a version 16 file) which is taking precedence over the v18 file (/exlibris/aleph/a18\_1/aleph/pc\_b\_eng/menu-circ.xml).

You need to perform the actions described in the article "[Customization of pc\\_b\\_eng and error\\_eng files in version 17-up \\*\\*MASTER RECORD\\*\\*](#)" (KB 8192-824) to correct this.
