

How to use Aleph to convert MARC to XML

- **Article Type:** General
 - **Product:** Aleph
 - **Product Version:** 20
-

Desired Outcome Goal:

Use Aleph to convert MARC records to XML (for input to another system -- no Aleph jobs require XML format for bib records).

Procedure:

1. Use file-01, file-02, and manage-18 to load the file into Aleph;
 2. Run print-03, specifying "MARC XML" as the output format.
