

Margins when printing from Aleph

- **Article Type:** General
 - **Product:** Aleph
 - **Product Version:** 18.01
-

Description:

Where do the margins come from when printing from Aleph?

Resolution:

When printing via the Print Preview, the Internet Explorer is always used.

As a result, the margins are taken from the Internet Explorer settings.

When printing via Normal Printing, the Internet Explorer or the HTMLPrint tool is used, depending on the setting `NewPrintType=Y|N` in `..\Alephcom\Tab\Alephcom.ini`.

As a result, in case of `NewPrintType=Y`, the margins are taken from the HTMLPrint settings.

To modify the margin settings of the HTMLPrint tools, please proceed as follows:

1. Doubleclick on `..\Alephcom\Bin\HTMLPrint.exe`
2. In menu "File", choose option "Edit configuration file" and go to tab "Margins"
