

How to re-start the Web server.

- **Article Type:** General
 - **Product:** DigiTool
 - **Product Version:** 3
-

Description:

How do I re-start the Web server?

Resolution:

From the server command line (logged in as user with dtl permissions)

```
>>start_w
```

Alternatively, you may use the UTIL menu to monitor, stop, start the server:

```
>>dlib dtl01
```

```
>>UTIL w (choose the appropriate option within UTIL w)
```
