Question

What determines a "no source" designation in query 2 statistics results ?

Answer

- * "no source" means that an OpenURL without a sid (source identifier) value was sent to SFX.
- * OpenURL could originate from a database that does not include source IDs
- * could be test OpenURL that contains metadata but no souce identifier.

Additional Information

Check if any in-house databases or OPACs do not include the source ID in the OpenURL
