

## Can the search results be broken down by format?

- **Product:** Voyager
- 

### Question

Can search results be broken into sections & sorted by format?

### Answer

Results cannot be sorted according to format. However, you can limit by format (add limits in the "Limit To" area in webvoyage.properties), and you can also add icons to search results, so you can limit by & mark items by their format in the search results.

### Additional Information

See "How Do I Add/Modify Search Results Page Icons?" in the WebVoyage Architecture & Configuration Models document
