

Change sort for title search?

- **Article Type:** Q&A
 - **Product:** Voyager
 - **Product Version:** 6.5.4
-

Question

When we do a Title search in WebVoyage, it always sorts the results alphabetically by title. Can that be changed?

Answer

Yes. The sort options are controlled in System Administration -- simply find the index in the search section and choose your sort options. You may need to restart the tomcat service after making changes in System Administration before those changes take effect.

You can also add an asterisk (*) to the search code in webvoyage.properties to make relevance the primary sort in WebVoyage (Tomcat interface).
