### Question

How do you adjust for a different time in a multiple time zone environment?

---

### Answer

- \* TIMEZONE-ADJ controls the setup for multiple times (located In ./xxx50/tab/tab100)
- \* The possible values are 0, + -. The plus sign adds one hour, the minus sign subtracts one hour.
- \* Restart the PC Server for changes to take effect immediately (util w/3/3)
