

returns during in-house use

- **Article Type:** General
 - **Product:** Aleph
 - **Product Version:** 20, 21, 22, 23
-

Description:

When processing items for "in-house use,"

A) Does ALEPH automatically return any checked-out items that are picked up and counted?

B) If ALEPH doesn't automatically return checked-out items, is there a way to have a message pop-up telling the staff operator that the item needs to be checked in?

Resolution:

When processing items for "in-house use"

A) ALEPH does *not* automatically return checked-out items. The item remains on loan to the patron, but a count is made for in-house use in the item's Circ Summary.

B) There is currently no option to have a pop-up message alerting the staff that the item needs to be checked in.
