Question

How are reports produced when running Fiscal Period Close?

Answer

Running the FPC batch job will not produce any reports unless specified by the user. Use the following parameters with

```
Pfpc_run
```

to also run reports:

```
-ro
```

requests that the Open Orders before and after reports be generated

```
-rf
```

requests that the Fund Snapshot before and after reports be generated

```
-rr
```

requests that the Rollover Status report be generated

Additional Information

These options can be combined to produce all reports by using the following command:

```
Pfpc_run -ro -rf -rr
```

Reports can also be selected when running FPC from WebAdmin (optional in Voyager 9.0.0 and higher)
