Desired Outcome Goal:

How to set up a MARC field 945 to function as a link in GUI and Web OPAC?

Procedure:

1) Add 945 to ./xxx01/tab/tab11_acc, with a new index GFT:

```
945## GFT
```

2) Add index GFT as ACC index to ./xxx01/tab/tab00.Ing

```
H GFT ACC 11 00 00 Gifts
```

3) Restart the ue_01 (util e/2, then util e/1)

4) Retrieve records with field 945 by Retrieve Catalog Records (ret-01).

5) Use the output of Retrieve Catalog Records (ret-01) as input for Update Indexes for Selected Records (manage-40).

6) In ./xxx01/tab/edit_doc_999.Ing, add GFT to col.13 :

```
## 945## D LGift Y Z E GFT
```

7) in ./xxx01/tab/tab_service, add the following lines:

```
945## www_f_service_find_acc GFT
```

```
945## www_f_service_scan_acc GFT
```

8) Restart the PC server and the WWW server.
