
How to find out when the Z950 server of xxxdb crashed?

- **Article Type:** General
 - **Product:** Voyager
 - **Product Version:** 7
-

Desired Outcome Goal:

Find out when the Z950 server of xxxdb crashed (where xxxdb is the Voyager Database Instance)?

Procedure:

1. Log in as root or Voyager
2. View log.voyager log in /m1/voyager/xxxdb/log
3. Messages similar to the following would appear in the log:
z3950svr[5939] - ERROR - Tue Aug 12 16:33:21 2014
- ZSESSION::ReadPDU - zsession.cpp[141]
Peer closed connection.
