

/exlibris/ Directory 94% full

- **Article Type:** General
 - **Product:** Aleph
 - **Product Version:** 17.01
-

Description:

Our Ex Libris directory is 94% full. When it hits 95%, it usually becomes locked and inaccessible.

Please help us clear the directory.

We are an ASP site.

Resolution:

I gzip-ed the files in the /exlibris/sfx_ver/sfx_version_3/tmp/applykddb-bak/ directory last night.

This reduced the space used on /exlibris/ from 94% to 72%.
