## p\_bind\_01 fails: Execution error : ../date\_x\_n.gnt'

- **Article Type:** General
  - **Product:** Aleph
  - **Product Version:** 18.01
- 

### Description:

We are getting

Execution error : file '/exlibris/aleph/a18\_1/aleph/exe/date\_x\_n.gnt'  
error code: 114, pc=0, call=19, seg=0  
114 Attempt to access item beyond bounds of memory (Signal 11)

when we try to run p\_bind\_01.

### Resolution:

I have added diagnostics to ./butil/b\_bind\_01\_a.cbl and re-run the job. The output log showed this:

```
...  
Z30-REC-KEY= 000091811000660  
Z30-REC-KEY= 000091908004270  
Expected Z30-REC-KEY= 000091908004270
```

Execution error : file '/exlibris/aleph/a18\_1/aleph/exe/date\_x\_n.gnt'

That is, the item it was processing was 000091908-004270.

```
SQL> select z30_expected_arrival_date from z30 where z30_rec_key = '000091908004270';
```

```
Z30_EXPECTED_ARRIVAL_DATE
```

```
-----
```

```
0
```

It should not have an expected arrival date of 0.
