

Label printing: splits the dot in strings like "vol."

- **Article Type:** General
 - **Product:** Aleph
 - **Product Version:** 20
-

Description:

The call number parse program defined in abc50/tab/tab_label_parse, splits the call number as follows:

QH
431
.A1
vol
.
72

We expect the label should print as:

QH
431
.A1
vol.
72

Resolution:

This is a known issue.

Please use the external software BIAF Label Printing. The documentation on the Doc Portal > Aleph > Aleph Customers > How To from Support > BIAF label printing, explains how to use this software with Aleph.

Additional Information

label printing, tab_label_parse, biaf
