

Only "English" displays as GUI language option

- **Article Type:** General

-

Description:

I can't find where the option to change the language is located in the configuration files for the GUI.

We have two languages - English (regular library language) and Archival (for archival processing language). I've been through the documentation - particularly the System Librarian's Guide - General chapter. It alludes to a .dat file controlling this, but I haven't been able to find the exact file.

Currently all our users have English language and cannot change it to Archival.

Resolution:

The `.\Alephcom\tab\conv_Ing.dat` controls what languages display when you click on the Tower-of-Babel icon on the lower right. The first language in the file is the default.

See KB 16384-39618 for complete info on adding another language in the GUI.
