Question

What is the right way to change the "deposit" path?

In Advanced configuration > General > General Parameters > deposit and change the "logic_deposit_area" path, the following message displays:

"Cannot update the Logic Deposit Area General Parameter" and it will not allow us to change the path.

Answer

Update of the "logic_deposit_area" parameter is not permitted if there are SIPs (submission information packages) in the following statuses:

1. TA/Deposit
2. TA/Loading
3. TA/Validation
4. Rejected
5. Draft

Please make sure there are no SIPs in these stages before trying to change this parameter.
