

## acq budget with bib info

- **Article Type:** General

### Description:

Due to budget trimming, we need lists of titles still on order that could be canceled to save money. The report needs to be one that could be given to faculty who originally initiated the orders.

acq-17 lists orders by budget, but no title info. acq-02-03 lists orders but not by budget.

Is there a report I'm missing that would, for example, list all on-order MUSVID-2009 by titles, or at least by system numbers? If I could get system numbers, I could then use a 'print' report for the title info.

The orders-per-budget.xsl includes a bib-info column (found that in the a-tree version) but does not generate any bib-info output.

### Resolution:

From site: Forgot to rebuild html.pck! [util i/6]
