

p_manage_01: sort "Illegal byte sequence"

- **Article Type:** General
 - **Product:** Aleph
 - **Product Version:** 18.01
-

Description:

p_manage_01 was suspended. I see this in the p_manage_01_a_10.log:

```
start sort /aleph/aleph/u18_1/cun01/scratch/manage_01_1_10
sort: can't read /aleph/aleph/u18_1/cun01/scratch/manage_01_1_10: Illegal byte sequence
end sort /aleph/aleph/u18_1/cun01/scratch/manage_01_1_10
...
... No such file or directory
... sort failure
```

Resolution:

[Note: The same problem, with the same solution, occurred with p_manage_02 at this site. See KB 16384-12801.]

I added a

```
setenv LC_ALL C
```

line to the beginning of \$aleph_proc/p_manage_01 (as the second line) and an

```
unsetenv LC_ALL
```

as the 2nd-to-last line of the proc (immediately preceding the "exit").

and the p_manage_01 ran successfully.
