## corrected documentation for the HOL fix routine.

- **Article Type:** General
- **Product:** Aleph
- **Product Version:** 19.01

---

### Description:

According to the tab\_fix header help, the HOL routine is "run automatically when a HOL record is created".

This is not correct. The HOL routine in XXX60/tab/tab\_fix is called only when the HOL record is created from the Items list > Tab 6. (HOL Links) > "Create New" button. It is called in addition to the INS routine.

In all the other cases of HOL record creation, only the INS routine is called.

### Resolution:

Use the INS routine in Holdings library (XXX60) instead of HOL in XXX60/tab/tab\_fix.

This issue is still open and was escalated to Development for further investigation <2012-01-22 01:00:01>.

---

## Additional Information

HOL, tab\_fix, fix routine
