## Util/S/1 Monthly loan statistics; z1002

- **Article Type:** General
  - **Product:** Aleph
  - **Product Version:** 17.01
- 

### Description:

I am using UTIL/S/1 to produce loan and return statistics by the hour

In the test region this utility is working however in the production region it is not. These are the differences I have noticed:

In the test region  
there is a trigger z36. for z1002 and in the mon50 there is a file\_list file

In the production there is no z36 trigger for z1002, and there is no file\_list in abc50

How do I create the necessary trigger in the production region?

### Resolution:

Note that most sites do not use util s/1. The normal way they get Circ Statistics is by running the p\_cir\_30 Circulation Statistics job. This job is much more flexible and powerful than util s/1.

But if you want it, the z1002 can be created as follows:

1. add these lines to the abc50 file\_list:

```
TAB z1002 1M 1M TS2D
TRI z1002_trigger
TRI z1002_trigger_1
TRI z1002_trigger_2
```

2. util a/17/1 for z1002

3. util a/17/6/1 to create the z1002\_trigger, z1002\_trigger\_1, and the z1002\_trigger\_2
