## Where are customized files stored during upgrade?

- **Article Type:** Q&A
  - **Product:** Voyager
- 

### Question

Where are customized files stored during upgrade?

### Answer

Files are placed in `/m1/upgrade` in directories reflecting the version number. For example, when upgrading to 8.2.0 files would be in `/m1/upgrade/2008.2.0/pre200820/voyager/xxxdb/`.
