## How to remove SFX link from Action Box

- **Product:** Voyager
  - **Product Version:** 7.0.1 and higher
- 

### Question

I don't use an OpenURL resolver. How do I remove the link from the Action Box?

### Answer

By default, the OpenURL resolver is set to display an image of SFX. To remove the link and image if you don't use an OpenURL resolver:

1. SSH to server as voyager user
2. Edit `/m1/voyager/xxxdb/tomcat/vwebv/context/vwebv/ui/[skin]/holdingsInfo.vbib.properties`
3. Near the top of the file, find following stanza and variable:

```
#=====
# Action Box Configuration
#=====
actionBox.openUrl.cfg.LOCAL.openUrlDisplay=Y
```

4. Set variable "N" and the image will no longer display.

### Additional Information

---

#### Note

Other Action Box options such as "Make a Request" and "Export" in the action box are removed in a different manner. See (for example): [Remove "Add to My List" link in the Voyager WebVoyage Action Box](#)
