
AVA from another record linked with LKR field

- **Article Type:** Q&A
 - **Product:** Aleph
 - **Product Version:** 18.01
-

Question

Several AVA fields appear in the record although the record has only one item. Where do they come from?

Answer

The BIB record is linked to another BIB record using the LKR ANA field. For the items attached to the linked record AVA fields are also created.

Additional Information

This functionality was implemented with rep_change 2271 in Aleph 18.
