
Difficulty with semi-annual seasonal pattern

- **Article Type:** General
- **Product:** Aleph
- **Product Version:** 16.02

Description:

We want to create a semi-annual seasonal pattern which is published only in spring/summer and autumn/winter.

Resolution:

This pattern should fix the problem; I checked it on our server, and the year is not skipped:

```
853 L $$81$$a^$$b^$$u2$$vr$$i(year)$$j(season)$$wq$$yps21/22,23/24
```

```
853X L $$81$$i2008$$j21/22$$320080101
```
