
HTML Reports error occurs after using browser's back button

- **Article Type:** General
 - **Product:** SFX
 - **Product Version:** 3
-

Description:

[Steps to recreate]

- (1) Access to SFXAdmin.
- (2) Click "HTML Report" link in the "KBUpdate Reports" section.
- (3) Check "Not deleted" radio button and then click Submit button.

-> You will see the content of the report.

(4) Back to the previous HTML report screen by using back button on the browser.

(5) Select another revision in "Available Revision:" select box.

[Expected result]

The screen is refreshed and no error occurs.

[Actual result]

The following error message shows up on the browser screen:

Software error:

Can't call method "fetchrow_array" on an undefined value at /exlibris/sfx_ver/sfx_version_3/sfxlcl3/lib/IOL/[DBReport.pm](#) line 603.

Resolution:
